CRESCENTIA

Applications Developed

PORTFOLIO & TECHNOLOGY STACK

Applications designed, built and shipped to production by Crescentia One, with the technology used in each.

Live
PAYMENTS & DELIVERY RUNNING IN PRODUCTION

Leopardol

D2C E-COMMERCE

Online storefront for an apparel brand, covering catalogue, cart and checkout. Razorpay is integrated for payments and Delhivery for shipping and tracking, so an order moves from payment to dispatch without manual handling. Customer accounts, authentication and transactional email are built in.

STACK Next.js · Node.js · Express.js · PostgreSQL (Neon) · AWS EC2 · Razorpay · Delhivery

20+
BRANCHES ACROSS MAHARASHTRA ON ONE SYSTEM

Chate CRM

MULTI-BRANCH CRM · EDUCATION

Lead and admissions management for an established coaching institute. Branch teams across Maharashtra work in one system under role-based access, so each branch, counsellor and head-office user sees only what their role allows. Covers lead capture and scoring, follow-up scheduling, duplicate detection, telephony and WhatsApp integration, and dashboards.

STACK Next.js · JavaScript · PostgreSQL (Supabase) · Cloudflare R2 · Resend · Vercel

50,000+
USERS ON THE PLATFORM

Profit Master

FINANCE EDUCATION & EVENTS

Course and event-ticketing platform for a Telangana-based trading coach, with a daily blog and advertising placements. Delivered as two separate applications — a public platform for learners and a dedicated admin console — so operations stay isolated from the customer-facing site.

STACK Next.js · Node.js · Express.js · Cloudflare (public app) · Vercel (admin app)

Live
EMBEDDED ON THE BRAND WEBSITE

Instafuel

AI SMART CHAT ASSISTANT · WELLNESS

A smart AI chat assistant embedded in the brand's website, answering customer questions from the company's approved product information only. Responses are retrieved from a curated vector store before the model replies, keeping the assistant guardrailed to the brand's catalogue and claims.

STACK Python · JavaScript · LLM · Qdrant vector DB · Railway · Qdrant Cloud

Live
COMPANY WEBSITE IN PRODUCTION

suroNEX

CORPORATE WEBSITE · AI & SECURITY

Company website for a technology vendor, built to present and promote their AI and physical-security product lines, with structured product pages and enquiry capture.

STACK JavaScript · Next.js · Vercel

IN DEVELOPMENT

Phoenix

ERP & IMS · REAL ESTATE & CONSTUCTION

A scheduling and progress-tracking platform extending their Autodesk Construction Cloud environment with mobile-first reporting from site. Field teams submit GPS-tagged, photo-verified progress through a two-level approval chain, writing back to ACC so the master schedule stays accurate without manual re-entry.

Also Delivered

Further applications are in production and in active development, including inventory and enquiry-to-payment workflow systems for industrial supply, and examination-preparation platforms for the education sector. Scope, architecture and references available on request.
